GLOSSARY OF SPECIES

GROUNDFISH:

CATFISH, Atlantic Wolffish (Anarhichas lupus)
COD, Atlantic (Gadus morhua)
HADDOCK, (Melanogrammus aeglefinus)
HAKE, White (Urophycis tenuis)
HALIBUT, Atlantic (Hippoglossus hippoglossus)
POLLOCK, (Pollachius virens)
REDFISH, Ocean Perch (Sebastes marinus)
TURBOT, Greenland Halibut (Reinhardtius hippoglossoides)
WINTER FLOUNDER, (Pseudopleuronectes americanus)
WITCH FLOUNDER, (Glyptocephalus cynoglossus)
YELLOWTAIL FLOUNDER, (Limanda ferruginea)

PELAGIC AND ESTUARIAL:

ALEWIVES, Gaspereau (Alosa pseudoharengus)
EEL, American (Anguilla rostrata)
HERRING, Atlantic (Clupea harengus harengus)
MACKEREL, Atlantic (Scomber scombrus)
SALMON, Atlantic (Salmo salar)
SHAD, American (Alosa sapidissima)
SILVERSIDE, Atlantic (Menidia menidia)
SMELT, American (Osmerus mordax)
TROUT, Rainbow (Salmo gairdneri)
TUNA, Bluefin (Thunnus thynnus)

MOLLUSCS & CRUSTACEANS:

CLAM, Softshell (Mya arenaria)
CLAM, Bar (Spisula solidisima)
CRAB, Queen or Snow (Chionoecetes opilio)
CRAB, Rock (Cancer irroratus)
LOBSTER, American (Homarus americanus)
MUSSEL, Common Edible Blue (Mytilus edulis)
OYSTER, American (Crassostrea virginica)
QUAHUAUG, (Mercenaria mercenaria)
QUAHAUG, Ocean (Artica islandica)
SCALLOP, Sea (Placopecten magellanicus)

OTHER:

IRISH MOSS (Chondrus crispus)
FURCELLARIA (Furcellaria fastigiata)

F O R E W O R D

This booklet has been compiled by the Resource Utilization and Marketing Division of the P.E.I. Department of Fisheries in an effort to combine information that is often sought by various government agencies and the general public.

Readers are asked to forward any suggestions for future issues of the Statistical Review to the author.

STATISTICAL REVIEW OF PRINCE EDWARD ISLAND FISHERY

Prince Edward Island's fishing industry employs over six thousand people, approximately 3,700 in fishing and 2,400 in processing. Many more are employed in industries which support the fishery such as outfitting and vessel construction. It is estimated that in excess of $180 million is contributed annually to the PEI economy from the primary and secondary sectors and support industries.

In 1987, landings of fish and seaplants decreased by 445,855 lbs., providing a total of 122,769,710 lbs. The total landed value of all fishery products in 1987 was $73.0 million, reflecting an increase of 8.6 % compared to 1986's landed value.

The four categories of fish species are: (1) groundfish, (2) pelagic and estuarial, (3) molluscs and crustaceans, and (4) marine plants.

Mollusc and crustaceans account for 80.0% of the total value of fishery landings in 1987 and 81.5% of the total value in 1986. The four major value species of the Island fishery in 1987 were lobster, herring, cod, and oysters. Marine plants, flounder, mussels, hake, and snow crab also contribute significantly to the total value of fishery products.

Total groundfish landings in 1987 decreased to 28.4 million pounds representing a 5.9% decrease from 1986. The value increased by 34.4% for a total of $7.5 million. With respect to the dominant groundfish species, increases have been recorded in hake and flatfish while decreases have occurred in landings of cod and redfish. Redfish landings from the offshore fleet sector, decreased by 22.3% lowering the landings from 10.1 million lbs. in 1986 to 7.9 million lbs. in 1987. The value of these landings also decreased by 22.3% showing a landed value of $944 thousand. Cod landings showed a decline with a decrease of 16.5%. Flatfish landings, on whole, increased by 3.7% and their value increased by 70.4%. Although flounder landings declined, landings of blackbacks, greysole, and yellowtails all showed improvements. Hake landings increased by 29.1% raising the landings from 3.5 million lbs. in 1986 to 4.6 million lbs. in 1987.

Landings of pelagic and estuarial fish slightly increased to 34.0 million lbs, an increase from 33.9 million lbs. in 1986. The landed value increased by 2.1% giving a total of $4.9 million. A factor for the increase in landings was due to the herring fishery whcih increased by 12.7%. Gaspereaux and smelt landings decreased by 26.1% and 43.3% respectively, while the value of gaspereaux landings increased by 10.9% and the value of smelt landings decreased by 36.2%. Eel landings decreased from 403,118 lbs. in 1986 to 371,006 lbs. in 1987 showing a decrease of 8.0%. The value of eel landings increased by 15.1%. Tuna landings decreased by 26.9% and their value decreased by 35.1% for a value of $239,700.

Total molluscs and crustacean landings decreased in 1987 from 31.4 million lbs. in 1986 to 29.8 million lbs. in 1987. Landed value increased by 6.2% increasing the value from $54.9 million in 1986 to $58.4 million in 1987. Landings in the lobster fishery experienced an increase in 1987 by 2.9% and the landed value increased by 11.3%. Oyster landings and values for 1987 decreased by 20.0% and 7.6% respectively. Bar clams increased by 115,373 lbs. in 1987 showing a 13.0% increase. Landings of softshell clams increased slightly by 4.3% while their value increased by 42.2%. Mussel landings and value decreased 15.0% and 8.9% respectively. Scallop landings and values were also on the decline while Rock Crab landings more than doubled in 1987.

The seaplants harvest increased in 1987, to 30.5 million lbs. an increase of 2.8 million lbs. compared to 1986.

A comparison of landings and values for the various categories is shown in the following tables.

P.E.I.
GENERAL FISHERIES FACTS
1987

Total no. of P.E.I. Fishermen and helpers	4,771
Total no. of Bonafide Fishermen*	1,385
Total no. of Commercial Fishermen**	3,386
Total no. of Vessels - Inshore (<55')	1,443
- Offshore (>55')	5

Licenses by Species:

Groundfish	931
Herring	865
Mackerel	822
Tuna	361
Scallops	398
Lobster	1,309
Eels	269
Silversides	32
Smelts	419
Snow Crab	16
Oysters	1,102

Total no. of employees in processing plants (approx. maximum)	2,400
Total no. of provincially licensed and federally registered export plants (not including buying stations)	34
Total no. of provincially licensed non-export plants	16
Total no. of major shellfish shippers	12
Total no. of trout growers	30

* Bonafide Fisherman is a fishermen that is registered as a commercial fisherman, and is the holder of a limited fishery license, and as well meets one of the following conditions:

(1) is the holder of a Category A lobster license;
(2) is able to show proof that 75 percent or more of his income was derived from his previous year's fishing; or
(3) can show proof of sales of fish of a landed value in excess of $15,000.

** Commercial Fisherman is a person 16 years or older that has participated in commercial fisheries and is registered with the Department of Fisheries and Oceans as a Commercial Fisherman and is not a bonafide fisherman.
